Majestic Arcade

Admin

The following was noticed after a quick scan of the updated UI for the admin. The administrator does not have the ability to see or do the following for the **user panel**;

1. A particular user account number (assigned pin that we had generated).
2. Balance of all users (and a specific user).
3. Deposit Tokens to a particular user (or all if needed).
4. Redeem Tokens for a particular user (cash out a user based off his current token balance).
5. Lock a particular user account (if necessary)
6. Log of various games played for each user.
7. Delete a particular user.

Admin Panel

The admin panel must be reflecting the following details.

1. Accounts management (this may entail [deposit amount, user/account #, create account / delete/cancel).
2. Accounts History (can pull up any account and see a complete log)
3. Transaction History
4. Jackpot history
5. Cashiers' management
6. Authentication for Admin panel
